Bachelor of Science in Information Technology and Systems

The use of information technology is widespread in society and increasingly important in the workplace. Within an organization, information systems support management processes at all levels — operational, tactical and strategic management. Information systems are vital to problem identification, analysis and decision making. While many organizations provide some training in information systems and technology, graduates who have an in-depth understanding of the opportunities that technology can provide to their organizations hold a distinct advantage. The BS ITS degree program provides a foundation in business and information technology. The curriculum gives students the information technology skills to improve business processes across a range of industries. Students pursuing this degree have strong analytical skills, embrace learning new things and enjoy solving problems. ITS professionals exist in a wide variety of domains including business, health care, government and non-profit organizations.

Careers in Information Technology and Systems
Graduates seek careers as business analysts, data analysts, system analysts, application developers and IT consultants. The job outlook is healthy. The U.S. Bureau of Labor Statistics reports that five of the 12 fastest-growing occupations relate to information systems. The bureau predicts the discipline will grow 15 percent from 2012 to 2022, faster than the average for all occupations.

Jindal School students must complete an internship as a requirement for their major. The Jindal School’s fully staffed Career Management Center (CMC), working in tandem with the University’s Career Center, helps students prepare for and seek internships, as well as post-graduation employment. Both centers are staffed with licensed counselors who provide students with strategies for mastering job interviews, writing professional cover letters and resumes and connecting with campus recruiters, among other services.

Information Technology and Systems at UT Dallas
A 120-hour curriculum leads to a degree in information technology and systems. All undergraduate degrees require a core of 42 hours. In the core courses, students learn theories and analytical techniques that can be applied to the functional areas of business, such as finance and marketing. The ITS curriculum includes the study of efficient design, delivery and use of information systems in an organizational context. Elective courses allow students to specialize in a particular area of information systems such as Enterprise Resource Planning or Business Intelligence and Analytics. A capstone course in the program allows students to apply information systems to solve real-world business problems.

The ITS program at UT Dallas provides students with the knowledge and skills necessary to succeed in a variety of jobs in today’s complex and evolving business environment.

Key features of the program include:

- Providing students with fundamental knowledge and training in system analysis and design.
- A student chapter of the Association for Information Systems and other student-led organizations.
- Industry guest speakers in courses and a speaker series that brings distinguished researchers from other universities to present their research to UT Dallas faculty and students.
- The Jindal School Information Systems Industry Advisory Board, which includes leading industry professionals in Dallas.

Living Learning Community
The Naveen Jindal School of Management Living Learning Community is a special opportunity for incoming freshmen interested in pursuing a business degree. Living Learning Community students live together in on-campus housing, attend classes together and participate as a group in social activities. For information, contact Associate Dean Marilyn Kaplan at mkaplan@utdallas.edu.
Management Honors Program
The Charles and Nancy Davidson Management Honors Program (DMHP) gives select undergraduate students the opportunity to enhance their experience in the Naveen Jindal School of Management. DMHP students receive opportunities to improve their leadership skills and work closely with UT Dallas professors.

DMHP program benefits include:
- Smaller class sizes
- Professional development events
- Community service events
- Scholarships
- Travel opportunities
- Honors notation on diploma

For more information please visit jindal.utdallas.edu/dmhp.

Fast-Track Options in the Jindal School
All undergraduate degrees in the Naveen Jindal School of Management offer a fast-track option. These programs allow undergraduate students to earn up to 12 credit hours that can be applied toward a master’s degree. Students with qualifying grades embark on the fast-track option in their senior year of their undergrad program. Pursuing a fast-track BS/MS or BS/MBA requires careful course selection and academic dedication but opens up additional career opportunities for those students who complete the program.

Naveen Jindal School of Management
The largest of the eight schools at UT Dallas, the Naveen Jindal School of Management offers a full complement of programs at the undergraduate, graduate and executive levels. The Jindal School’s mission is to meet the challenges of a rapidly changing, technology-driven, global society by partnering with the business community to:

- Conduct knowledge-enhancing management research.
- Deliver high-quality management education to a diverse group of undergraduate and graduate students and practicing executives.
- Develop, innovate and continuously improve programs advancing management education and practice.
