Bachelor of Science/Bachelor of Arts in Physics

The Department of Physics is one of the original departments of UT Dallas since its beginning in 1961. The department grew from the Southwest Center for Advanced Studies, a research institute started by Texas Instruments (TI) scientists and engineers. Close ties to TI continue to this day as evidenced by the Natural Science and Engineering Research Laboratory, a 192,000-square-foot research facility designed in cooperation with TI.

Our faculty includes world-renowned experts in space science, cosmology and astrophysics, particle and high-energy physics, nanotechnology, materials science among others. Faculty members are affiliated with and conduct research at physics facilities worldwide, including the Large Hadron Collider. The University's Career Center is an important resource for students pursuing their careers. Licensed counselors are available to provide strategies for mastering job interviews, writing professional cover letters and resumes and connecting with campus recruiters, among other services.

Career Potential

Physics graduates from UT Dallas arrive at graduate school or in the work force prepared to work in the vast array of fields open to modern graduates with a background in physics. Nanotechnology and other contemporary and emerging disciplines are covered throughout the educational process, which ensures that our graduates are ready to excel in highly competitive, sophisticated science environments.

The lower-division course requirements for the BA degree are the same as those for the BS degree. At the upper-division level, 15 hours of advanced physics courses are replaced with 15 hours of science electives.

Fast-Track

The Fast-Track Program enables exceptionally gifted undergraduate students to include master’s level courses in their undergraduate degree plans. The hours required to complete the master’s degree are reduced by the number of Fast-Track graduate hours completed.

High School Preparation

High school students need an interest in science and an aptitude for physics, chemistry and mathematics. A background in these classes will help ensure success at the undergraduate level. Entering freshman need a minimum of three and a half years of math, including trigonometry, and three years of science beyond physical science.

School of Natural Sciences and Mathematics

UT Dallas’ School of Natural Sciences and Mathematics offers degree programs for undergraduate and graduate students in biology, chemistry, geosciences, mathematics and physics. In addition to regular coursework, undergraduates are encouraged to participate in research alongside the faculty and graduate students. From the world-renowned Alan G. MacDiarmid NanoTech Institute, headed by Dr. Ray Baughman, to the William B. Hanson Center for Space Sciences — where Dr. John Hoffman helped discover water on Mars — the science education at UT Dallas is a hands-on, high quality experience for undergraduates and graduate students alike.
The UTeach Dallas program offers students the opportunity to complete the requirements for high school teacher certification along with their regular BS or BA degrees.

Quick Facts about the School of Natural Sciences and Mathematics:
- Established in 1975.
- Six departments.
- More than 3,100 students.
- 26 degrees offered.
- Faculty include a Nobel Prize winner and a member of the National Academy of Engineering.

Degrees Offered

**Bachelor of Science:** Actuarial science, biochemistry, biology, chemistry, geosciences, mathematics, molecular biology, physics

**Bachelor of Arts:** Biology, chemistry, physics

**Master of Science:** Actuarial science, bioinformatics and computational biology, biotechnology, cell and molecular biology, chemistry, geosciences, mathematics, physics

**Master of Arts:** Teaching in mathematics education, teaching in science education

**Doctor of Philosophy:** Cell and molecular biology, chemistry, geosciences, mathematics, physics

**Certificates**
- Postbaccalaureate certificate in biomedical science
