SECURITY AND SAFETY**

SUB-TOPIC

ACCIDENT PREVENTION

Accident prevention requires the support and cooperation of each individual on the UTD campus.

Accidents can best be prevented by removing safety hazards and increasing people's awareness of safety considerations.

Before a safety hazard can be removed or adequate safety measures taken, the University must be notified of its existence (see H3-140.0). The University is dependent upon the cooperation of its faculty, staff, and students for the performance of this reporting function.
