What is MoCA?
MoCA is a small group articulation therapy program for preschool and early school-age children with moderate to severe articulation and phonological disorders. MoCA is designed to teach children complex ideas about movement and their articulators (parts of their mouths) in fun and simple ways. The teaching philosophy relies on helping the child understand more about the production of target sounds, shaping and encouraging use of new motor patterns, and strengthening the underlying musculature as needed. MoCA is an intense articulation therapy program conducted by a licensed speech-language pathologist with the support of graduate student clinicians.

MoCA:
- Incorporates motor planning principles in gross and fine motor activities during the session
- Focuses on target sounds or phonological processes at various levels of complexity through individualized treatment plans
- Helps children become more intelligible communicators

Evaluation Requirement:
An intake assessment is required for all new patients. The cost of the intake is $50 and is not insurance eligible. To schedule an assessment, please call the Dallas location at 214-905-3030.

When:
June 6 - July 6, 2017
Tuesdays and Thursdays
10:30 a.m. - 11:30 a.m.

Where:
Callier Center Dallas
1966 Inwood Road | Dallas, Texas 75235

Cost:
$180/session (may be insurance eligible) + $75 enrollment fee
