What is PLDP?
PLDP (Preschool Language Development Program) is a therapeutic program designed for children ages 3 to 5 years with language disorders. In a classroom setting, participants receive intensive group language intervention and participate in developmentally appropriate activities within thematic units to address individual speech and language goals.

The goal of PLDP is to create a natural environment through which children can improve communication abilities with adults and same-age peers in order to prepare themselves to be successful in mainstream preschool or kindergarten classrooms. The program also includes both standardized and criterion-referenced assessment of the child's language skills.

PLDP is led by a licensed speech-language pathologist with support from graduate student clinicians to maintain a ratio of three to four children for every two clinicians. The program operates on the University of Texas at Dallas semester calendar. Fall and spring semesters typically run for 12 weeks, and summer sessions run for six weeks. In order to provide more continuous therapy, minimester sessions are also offered between semesters.

When:
Monday through Thursday
9:00 a.m. - 11:30 a.m.
Available fall, spring and summer semesters

Where:
Callier Center Richardson
2895 Facilities Way | Richardson, Texas 75080

Cost:
$90/session + $75 enrollment fee
(may be insurance eligible)
