SKILL is a six-week program during the summer. It is designed for school-aged children who need help with executive function skills, such as listening and organization.

The program will focus on:
- Identifying key words and ideas for increased understanding
- Organizing time and belongings for increased efficiency
- Listening and following directions
- Improving self-advocacy skills
- Awareness of strengths

Children who may benefit from this program include those diagnosed with:
- Auditory Processing Disorder
- Language Disorder
- Attention Deficit Disorder
- Learning Disability
