Our campus goal is to become sufficiently “event-ready,” so we can continue our teaching, research and service mission with minimal interruption. To reach that goal, we help departments throughout the campus create continuity plans that identify coping strategies when events occur, as well as preparations that can be completed in advance.

I can help you with
- Continuity Planning
- Facilities Inventory
- Records Retention
- Risk Management

Contact Information

The EH&S vision revolves around our desire to create a safe environment at UT Dallas. UT Dallas’ expansion has highlighted our flexibility in accommodating new University initiatives. Each new initiative presents EH&S with an opportunity to ensure that our office is providing maximal value to the UT Dallas community.

C. 214-934-5234

World-class safety performance in higher education begins with individual responsibility for environmental safety and health. Zero injuries and accidents on campus can be a reality. All occupational injuries and illnesses can be prevented, and all operating exposures can be safeguarded. Preventing hazardous incidents and injuries contributes to the campus community well-being and business success.

Environmental Management

David Glenn Liner, MBA, MS  
Director of EH&S  
E. david.liner@utdallas.edu  
P. 972-883-6111  
C. 214-773-3281

Environmental Health & Safety’s (EH&S) comprehensive environmental approach drives continuous improvement across our operations. We are systematically implementing performance standards and engineering calculations into our campus operations to minimize emissions, discharges and waste, and to promote responsible waste management practices.

I can help you with
- Campus Environmental Health & Safety Risk
- Compliance with Federal, State, and Local EH&S Regulations
- Environmental Management
- Fire Safety Management Program
- Industrial Hygiene Management Issues
- Lab Management Program
- Occupational Safety Management

Emergency Management

Mariah Armitage, CEM, TEM, BS  
Director of Emergency Management  
E. mariah.armitage@utdallas.edu  
P. 972-883-2420  
C. 469-203-2389

The Office of Emergency Management (OEM) is tasked with creating a culture of emergency preparedness and response across the University. OEM is responsible for coordinating a comprehensive, all-hazards approach through all cycles of an emergency — preparedness, response, recovery and mitigation.

I can help you with
- Building Safety and Emergency Planning
- Campus Emergency Notification Systems
- Campus Emergency Response Team Program
- Emergency Management Training
- Emergency Operations Planning
- Emergency Preparedness Presentations
- General Emergency Preparedness
- SAFE Leader and Floor Monitor Program
