

# Hide Items

---

To hide an item or folder in eLearning, while in the Build tab, click on the action button for that item. Choose **'Hide Item'**.

Notice now that, while you are still able to see the item in the Build and Teach tabs, it is obviously grayed out and is labeled "(Hidden)".

If you now switch to the Student View tab, you will see that this item is not visible to the students.

To make the item visible, click on the action button for that item, then choose **'Show Item'**. The item will now be visible to students.
