

Post in a Message in a Threaded Topic

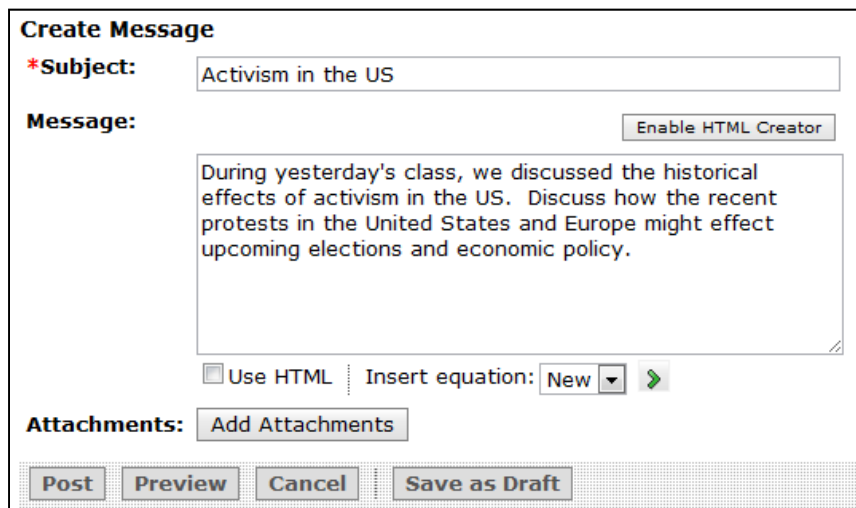

To post a message in a threaded topic, while in the Build tab, click on Discussions in the course menu, then click on the threaded discussion topic you want to post in.

Click the [Create Message] button.

Create Message

Give your post a Subject, then type in your message content. Add an attachment if needed, then click [Post] when ready.

The 'Create Message' form includes a subject field with the text 'Activism in the US'. The message body contains the text: 'During yesterday's class, we discussed the historical effects of activism in the US. Discuss how the recent protests in the United States and Europe might effect upcoming elections and economic policy.' There are buttons for 'Enable HTML Creator', 'Add Attachments', 'Post', 'Preview', 'Cancel', and 'Save as Draft'. A 'Use HTML' checkbox and an 'Insert equation' dropdown are also visible.

Your post will now appear in the threaded discussion topic.
