At The University of Texas at Dallas, we bring people and ideas together to create the future—ours, yours and the world’s. We like to think big, and we’re eager to try creative approaches in solving problems.

**Discovery**

With cutting-edge disciplines from bioengineering, to audiology and brain science, to nanotechnology, global business programs and other critical 21st-century fields, we offer rigorous academics with practical applications.

Come discover what we’re all about!

As a rapidly growing research institution, The University of Texas at Dallas attracts a diverse group of students and faculty members to the vibrant, dynamic and globally connected Dallas–Fort Worth area.

Growth

UT Dallas offers the reputation and resources of a big university combined with the close-knit community of a smaller one where the average student to faculty ratio is 22-1. It’s the perfect balance of academic and campus life.

“Faculty and staff of UT Dallas are available to students and are always willing to offer advice, connections, etc. I was able to be accepted into the Summer Medical and Dental Education Program at the Yale School of Medicine and the Summer Internship Program at the Johns Hopkins School of Medicine because of the help, guidance and care of my mentors, advisors and faculty of UT Dallas.”

utdallas.edu/tier-one
The Dallas-Fort Worth Metroplex is one of the nation’s largest urban areas, with shopping, entertainment venues—including five major sports teams—and museums and art galleries. You’ll find plenty of opportunities for discovering entertaining and exciting things to do and see.

Slices of brick oven pizza served in the dining hall per semester: >60,000

Rankings:
The Princeton Review and Kiplinger’s magazine consistently call us one of the best 100 values among public universities, and Times Higher Education ranks the University #1 in Texas, #4 in the nation and #16 out of the top 100 colleges in the world under 50 years of age.
Learn

Ready to explore the world around you? With eight schools and more than 130 academic programs taught by some of the top minds around the world, you will find yourself part of a lively intellectual community where big visions become reality.

“UT Dallas is rapidly developing into a premier research institution, and with that comes great opportunities for research-minded undergraduate students. It’s hard work, but in my experience, undergrads who get involved with faculty research have an edge in terms of their options post-graduation, particularly for those who want to continue toward a graduate, law or medical degree.”

Robert Morris, PhD
Associate Professor of Criminology, Director of the Center for Crime and Justice Studies and UT System Regents’ Outstanding Teaching Award Recipient

Research Interests: Contemporary issues in crime and justice

utdallas.edu/academics
Interested in how technology entered the Western civilization? Or scrutinizing books that have a past connecting them to generations of scholars? Arts and Humanities connects the humanities (philosophy, literature, history), with visual and performing arts so you can learn how to think creatively as well as critically.

ah.utdallas.edu
Want to combine computer science and engineering with the creative arts and humanities? How about creating the digital media of tomorrow? With our ATEC and EMAC programs you can do just that, bringing you to the place where arts and technology not only meet but collide in unexpected ways.

utdallas.edu/atec
If you’ve ever wondered why humans behave the way they do, then our programs in psychology and neuroscience are for you. Not only can you delve into topics such as psychology, child development, autism and cognition, but you can gain an in-depth understanding of how the brain, one of the most complex organs, functions.
EPPS
School of Economic, Political and Policy Sciences

How would you like to advance positive societal change on a local, national or global level? In studying criminology, political science or sociology, you’ll not only have the skills to understand the problems we face in today’s society but the tools to help solve them.
Engineering a better world is a tall order, but working on cutting-edge technology such as nanoscience, bioengineering, artificial intelligence, cochlear implants, organic electronics and cyber security can help you achieve it. Plus, who wouldn’t want to help build a robot?

Erik Jonsson School of Engineering and Computer Science

Engineering a better world is a tall order, but working on cutting-edge technology such as nanoscience, bioengineering, artificial intelligence, cochlear implants, organic electronics and cyber security can help you achieve it. Plus, who wouldn’t want to help build a robot?

* MS in Computer Science features five tracks from which to choose: traditional computer science, networks and telecommunications, intelligent systems, information assurance, and bioinformatics.

** MS in Electrical Engineering features seven tracks from which to choose: biomedical applications of electrical engineering; circuits and systems; communications and signal processing; digital systems, optical devices, materials and systems; RF and microwave engineering; and solid-state devices and micro systems fabrication.

*** Systems Engineering and Management is a joint program with the School of Management.

ecs.utdallas.edu
Why limit yourself to just one major when you can have them all by designing your own degree plan? Your curiosity will be engaged as you explore arts and sciences, media, culture, and business issues.

* BS in Interdisciplinary Studies includes a concentration in healthcare studies.
Our rapidly changing, technology-driven, global business society needs bold leaders and entrepreneurs who not only understand the latest trends but set them. You will learn first-hand what it takes to make it in the marketplace of Dallas, a city that *Foreign Policy* magazine predicts will be one of the “most dynamic cities in the world” by 2025.

* Masters of Business Administration programs include Full Time MBA, Professional (Part Time) MBA and Online MBA. Online programs also are available in Accounting (MS) and Information Technology and Management (MS).

** Systems Engineering and Management is a joint program with the Erik Jonsson School of Engineering and Computer Science.

jindal.utdallas.edu
Will you be the one to find new treatments for fighting diseases like cancer? What about exploring what lies at the center of the Earth? With our programs in the natural sciences and mathematics, you will make new discoveries about people and the environments that surround them.

nsm.utdallas.edu
Marjorie Zielke, PhD
Assistant Professor of Arts and Technology and Associate Director of the Institute for Interactive Arts and Engineering

Research Interests:
Serious game projects oriented toward professional development and education in both the military culture and medical sectors

“The most exciting thing about our arts and technology curriculum is the weaving of our research with class instruction. This happens in so many important ways, but perhaps the most compelling is that our fresh research becomes part of courses almost immediately, allowing students to participate in the most current thinking in computer-based media both academically and professionally. In a field that changes constantly, this integration is critical to assure that we are teaching the most advanced information possible.”

Emma Mathes
Arts and Technology Major, National Merit Scholar, and Clark Van Pelt Scholarship Recipient

“The ATEC program allows me to study a creative major while still having access to academic classes, which was something I couldn’t get at an art school. I’m a nerd who loves sci-fi, comics, art, computers—definitely a good fit for ATEC. UT Dallas has a great atmosphere, and the moment I set foot on campus, I knew I wanted to go to school here.”
More than 500 companies recruit and hire UT Dallas students every year, including top Fortune 500 companies such as AT&T, Cisco Systems, ExxonMobil, IBM, Intel, Microsoft, JPMorgan Chase & Co. and Texas Instruments. You can be one of them.

Our Career Center services include one-on-one career counseling, job search strategies, externships and internships to put your career on track.
Research

UT Dallas offers a hands-on approach through numerous undergraduate research opportunities that allow you to work side-by-side in collaboration with our award-winning, globally recognized faculty. Unlocking the secrets of everything from nanoparticles to celestial objects millions of light-years away provides you with environments ripe for scientific discovery and innovation.

utdallas.edu/research
Juan E. González, PhD
Professor of Biology, Associate Dean of Graduate Studies for the School of Natural Sciences and Mathematics

“Research is part of our DNA at UT Dallas. We started as a research institution and that is still part of our core mission. All of our students play a critical role and are a source of energy, ideas and hard work that leads to new discoveries and insights. A large number of undergraduate students have worked in my lab, each of them contributing, in their unique way, to our understanding of how bacteria enhance their ability to interact with a potential host by communicating with each other via chemical signals.”

Dr. Rebecca L. Files
Assistant Professor of Accounting
Sydney Smith Hicks Faculty Fellow

“There are a lot of misconceptions about accounting: That it’s boring; that it’s purely math equations. I love convincing students otherwise. People assume that if you are an accountant, you must be really good with numbers. While that might be true, I think it’s more about having an organized mind and putting information in the correct buckets.”
We know there’s more to college life than just academic excellence, and at UT Dallas you will find endless opportunities to interact with fellow students, create lasting memories and have new experiences.
Whether you’re looking for new friends or a way to get involved, there’s something at UT Dallas for you.

**Participate**

We offer:

- More than 325 Student Organizations
- Living Learning Communities
- Study Abroad Programs
- Recreational Sports
- Student Media
- Honors Program

utdallas.edu/enroll/campuslife

Brooke Knudtson  
Political Science Major  
Student Government President

“Our student population is different from other universities because our students are more focused on studies; however, FUN is a priority. We pride ourselves on being a challenging academic institution. If you want to advance your education, and still be involved with multiple organizations, look no further than UT Dallas.”
UT Dallas’ intercollegiate athletic program is one of the most successful in the NCAA Division III American Southwest Conference (ASC).

**Play**

Our teams include:

**Men’s**
- Basketball
- Soccer
- Golf
- Baseball
- Tennis
- Cross Country

**Women’s**
- Basketball
- Soccer
- Golf
- Softball
- Tennis
- Cross Country
- Volleyball

cometsports.utdallas.edu
If you’re looking to experience independence away from home and make new friends in the process, our residence halls are just the thing for you. Our Living Learning Communities also enable freshmen with similar majors and interests to live together, study together, participate in social functions and have the opportunity to interact with faculty in various disciplines.

Home Away From Home

utdallas.edu/reslife
Your UT Dallas journey begins with **Freshman Orientation**, a two-day introduction to campus, culminating with class registration.

Next up is **Comet Camp**, which is a three-day, two-night adventure that offers you the opportunity to bond with new friends and get a head start on learning about what to expect in college.

**Freshman Year Experience**

Finally, **Success Camp** provides you with important advice from the experts: faculty and staff who have suggestions for making the most of your time in college. You’ll also have a chance to mingle with upperclassmen who will give you inside tips on programs, activities and the resources or professors that can help partner your success.

utdallas.edu/fye
Transfer

Almost half of our student body is comprised of transfers, who are consistently ranked among our most successful students. Wherever you have studied before, we invite you to come join the UT Dallas community and explore new goals and opportunities.

utdallas.edu/transfer
“What I like best about UT Dallas is the limitless resources. There is literally something for everyone. With numerous social, professional, academic, religious and cultural organizations on campus, it’s impossible not to find your niche. Also there are services specifically for international students, transfer students and veterans.”
The cost of college varies from student to student, but here is what you can expect for one full year of attending UT Dallas. For the most current tuition estimates, refer to the financial aid website at financial-aid.utdallas.edu.

*Tuition projections are based on 30 hours (15 hours per semester) beginning fall 2013. Residents of Oklahoma pursuing their first undergraduate degree pay the Texas resident rate plus $30 per semester credit hour but must apply for a tuition waiver through the Financial Aid Office.

utdallas.edu/tuition
All incoming students receive the benefit of UT Dallas’ Guaranteed Tuition Plan, which allows you to receive a four-year, locked-in rate on up to 15 credit hours per semester.

Financial Aid and Scholarships

Additionally, more than half of all UT Dallas students receive some sort of financial aid that includes grants and scholarships. All first-time college freshman undergraduates admitted to the University in the fall automatically are considered for an Academic Excellence Scholarship (AES) Award. Likewise, admitted transfer students are considered for Comet Transfer Scholarships that are renewable for up to six semesters.

utdallas.edu/scholarships
UT Dallas is a special place, but don’t just take our word for it—visit campus and check us out. Our campus tours will guide you through the heart of UT Dallas as you explore the Student Services Building, Science Learning Center and Natural Science and Engineering Research Laboratory, among many others. You also can visit the University Commons Residence Halls and the state-of-the-art Edith O’Donnell Arts and Technology (ATEC) Building.

Call 972-883-2270 or 1-800-889-2443 to schedule a tour, or visit utdallas.edu/visitors for more information. You can also check out our virtual tour at utdallas.edu/virtualtour.
Next Steps

As an incoming student there are several things you’ll need to do before your semester begins:

1. Declare your intent to enroll online through Galaxy.
   Visit our student information system at utdallas.edu/galaxy. While you’re there, check for any outstanding requirements you’ll need to fulfill before the start of classes.

2. Send your final transcript.
   Make sure to send a final transcript showing completion of all courses.

3. Apply for housing.
   Priority application deadline for housing is May 1, so apply now at utdallas.edu/housing.

4. Register for orientation.
   Visit utdallas.edu/orientation.

5. Apply for financial aid.
   Visit utdallas.edu/student/finaid. Priority application deadline is March 15.

6. Submit bacterial meningitis vaccination documentation.
   Visit utdallas.edu/vaccine for more information.
At The University of Texas at Dallas, we’re not one size fits all. We like to keep it personal. That’s why we developed an online brochure that encourages you to choose the exact programs, activities and interests that are most important to you.
