302-120 Founders Renovation
The University of Texas at Dallas

Project Description

Phase IV:
The project consists primarily of interior fit-out of approximately 14,800 square feet on the third level of the building, transforming existing shell space into new faculty research laboratories, support space, and offices. Also included will be the expansion and replacement of existing public restroom facilities. (Square Footage costs indicated below represent all four project phases)

Phase III:
The Project consists of the renovation of all floors of the existing facility which is over forty years old and construction of a new entrance lobby on the east end of the building. The project is comprised of approximately 109,700 GSF which includes the new east lobby.  Project includes new classrooms, offices and related support spaces. Project also includes an add alternate which will...
