

## Acknowledgments:

Compiling a database like this is not possible without the help of many people. First of all, my sincere and special thanks go to the whole staff of the Department of Special Collections located at McDermott Library, University of Texas at Dallas, especially to Dr. Larry D. Sall (former Head of the Dept. of Special Collections at UTD and now Director of the Libraries at UTD) and to Dr. Erik D. Carlson (actual Head of the Dept. of Special Collections at UTD) for their precious help during many, many years of research and for their kind permission to publish this database on a website of the Air America Archives. I would also like to thank all the other nice people who worked and still work at the Dept. of Special Collections whose help and encouragement was always very welcome. Thanks to Mary Caspari, Carole Thomas, Rick Biddenstadt, Toni Huckaby, Paul Oelkrug, Thomas Allen, and to all the nice volunteers we met.

My sincere thanks go also to all my friends of the Air America Association, especially to Brig. Gen. Harry C. ("Heinie") Aderholt, to Frank Bonansinga, James Keck, Jesse Walton, and to John Wiren, whose indefatigable help was very precious to me, but also to Jackson L. Forney, Joe Hazen, Bill Lively, John and Sandra McRaney, Jane Mullins, Preston S. Myers, Paul Oostmeyer, Jim Pearson, Judy Porter, John Tarn, and William A. White for their kind assistance. My special thanks also go to Archie DiFante of the USAF's Historical Research Agency for sorting out and sending me so many microfilms of historical USAF material. I'd also like to thank the following representatives of various organizations: G. Maxine Bennett (Federal Aviation Administration), Shirley Burden (Federal Aviation Administration), Chang Kuo-Cheng (Director General, CAA, Republic of China), Charan Dass (Office of the Director General of Civil Aviation, India), Prof. William Leary (University of Georgia), Heinrich von Krosigk (Dornier Aircraft / Daimler-Benz Aerospace), Daniel J. Libertino (Igor I. Sikorsky Historical Archives), W. Odermatt (Pilatus Aircraft), His Royal Highness, Prince Tiao Sisouphannouvong (Directeur de L'Aviation Civile du Laos), as well as Charles O. Davis (author of the book: *Across the Mekong*), and Christopher Robbins (author of the books: *Air America* and *The Ravens*). Finally, I'd like to thank the following persons for information about the subsequent histories of former Air America aircraft: N.C. Aird, Alain Genève, Peter C. Hillman, Lars Olausson, Robert J. Ruffle, Martin R. Smith, and John A. Whittle.

But there is one person to whom I owe the most intensive and the most persistent help of all the help I received. I therefore say my deepest thank you to my beloved wife Betty for her incredible patience and her constant physical help. She made thousands of photocopies and worked with me together for many weeks to make this database as complete as possible, but without her help, it would never have come to existence.
