The Cessna T-41D “Mescalero” was the military equivalent to the Cessna 172. In 1969, DEPCHIEF, that is “Deputy Chief, Joint United States Military Advisory Group, Thailand”, the US military unit responsible for Military Aid to be supplied to Laos, requested a decrease of the 32 O-1/U-6/U-17 aircraft flown by the Royal Lao Air Force and the Ravens “and their replacement by 31 U-17/T-41 aircraft” (Liebchen, MAP Aid to Laos 1959-1972, p.72). But then, the Chief of Staff, USAF, advised that additional O-1s would be available for Laos, and so, “FY 69 programming of T-41 aircraft to alleviate the O-1 shortage was reprogrammed for FY 71 because of the projected O-1 availability” (Liebchen, p.74). A “significant aircraft program for CY (Calendar Year) 1970 was the funding under the MASF FY (Fiscal Year) 71 Program of six T-41D aircraft. These aircraft had to be produced in CONUS (Continental United States), and were slated for delivery in-country by the close of FY 71. This marked the introduction of this type of aircraft into the RLAF inventory” (Liebchen, p.95). “Rounding out DEPCH aircraft transactions in 1971 were the deliveries of the programmed T-41s. Two of these aircraft arrived at Udorn on 15 and 20 March 1971, respectively, with the final four arriving at Udorn on 26 June. These aircraft were to be used at Savannakhet for pilot training” (Liebchen, p.111). “The in-country training programs were strengthened and enhanced by an increased emphasis on English language training at the Vientiane and Savannakhet schools. Savannakhet also boasted the new T-41 preliminary pilot training program begun in April 1971. Within three months, six T-41 Instructor Pilots and twenty pilot trainees had successfully completed the course” (Liebchen, p.113). On 3 February 72, all 6 T-41s were still active, and so they were on 25 June 72 (Liebchen, pp.115 and 180). As they were maintained by Air America’s facilities at Udorn, they are given in the lists of “Assigned, maintained aircraft”, of which the 1 January 72 (PLNG-UTH-72-005) to 1 June 73 (PLNG-UTH-73-154) editions are preserved in: UTD/Bisson/B5, microfilm reels 23/4.
