The types of missions flown by Air America’s Apaches:
In Laos, the main task of Air America’s Apaches seems to have been communications flights and to transport small goods to outlying villages. Later in South Vietnam and at Bangkok, the Apaches were used for the same type of missions, mostly under USAID-contracts. But although USAID was officially the main contractor to Air America in South Vietnam, all CIA missions in South Vietnam were flown as part of the USAID contracts, and within those contracts, all CIA requirements were handled with priority (Harnage, A thousand faces, pp. 81/2). Former Air America pilot George Taylor recalls his flights in Air America’s Apache in South Vietnam: “The majority of flights out of Saigon was either for the Embassy or USAID (United States Aid for International Development) and was used mostly to fly passengers and light cargo (mostly medical supplies) around the country. I did on occasion fly Mr. William Colby, who at that time was CIA Station Chief, to some of the strips in Vietnam and on the Vietnam / Laos border and at times some of his people.” (e-mail dated 8 May 2005, kindly sent to the author by George Taylor). And “the military in the Embassy would often get to use it when needed” (e-mail dated 22 May 2005, kindly sent to the author by George Taylor). One of Air America’s Apaches was used out of Phnom Penh until January 64: “The Apache in Cambodia […] was used mostly by USAID, to take people around the country; mostly the people were in suits and really looked like they were just seeing the sights.” (e-mail dated 29 May 2005, kindly sent to the author by George Taylor). But in the early sixties, the CIA supported a paramilitary group called “Khmer Serei” or “Free Khmer” in Cambodia (Sutsakhan, The Khmer Republic at war, p. 6), and possibly Air America’s Apache was also used for contacts with them.

Statistics according to official Air America documents:
1962: 2 (Minutes ExCom-AAACL of 23 January 62, in: UTD/CIA/B7F1)
1963: 1 Apache was operated in Laos, the other one in Cambodia in 63; both were to be replaced by Aztec Bs in 1963 (Minutes ExCom-AAM of 12 February 63, in: UTD/CIA/B3F4); one operated out of Phnom Penh, one out of Saigon in late 63; both will be released in January 64 and should be put up for sale (Minutes ExCom-AAACL/AAM of 10 December 63, in: UTD/CIA/B7F2)
1972: Inventories of 31 March 72 > 30 November 72 (in: UTD/CIA/B1F10): 2 on both dates
