The types of missions flown by Air America’s UH-34Ds:

The Sikorsky UH-34D was one of Air America’s work horses in Laos. With the exception of “803”, which was always operated in Thailand and so had a white color scheme similar to that of Royal Thai military aircraft, all Air America UH-34Ds were olive drab and did not bear any titles. They looked like Royal Lao Air Force UH-34Ds, except for the fact that RLAF UH-34Ds bore an Erawan and a four digit serial painted in yellow, while the Air America serial was white. Officially all Air America UH-34Ds were based at Udorn Royal Thai AFB where they were maintained periodically, but normally, all of them operated in up-country Laos for several weeks. Other Air America or CASI planes flew the crews as “dead heads” to the location from where they had to work for a period of several days. During that period the crews either slept in or next to their helicopter or were the guests of the local villages where they were temporarily stationed. At several “hubs” like Sam Thong there were even hostels where to get a shower. There were several types of missions flown by the UH-34Ds: to transport all sorts of supplies (food, ammunition, fuel) to gun positions and other outposts; to fly medical evacuation missions from the villages or from battle areas, to transport indigenous, especially Hmong troops from one point to another during the battle (“leap frog” technique); to evacuate villages and outposts under fire, to rescue downed aircrews, and even to transport back to Udorn small aircraft like Helio Couriers or Pilatus Porters that had had an accident in Laos. In this case, the fuselage of an ill-fated aircraft was tied to one side of the UH-34D and its wings on the other side. Normally an Air America UH-34D could carry 12 or 13 passengers or cargo. All of them had armor plates and a hoist; inertia reels and a sling could be installed to carry outside cargo (Aircraft and avionics information as of 1 April 73, in: UTD/Kaufman/B1F14). In 1972 and 1973, Air America’s Udorn facility also reconstructed 14 former US Marines UH-34Ds for use by the TNI-AU or Indonesian Air Force - this was called “Project Peace rotor”.

The Sikorsky UH-34Ds of Air America’s Project “Peace rotor”:

In 1972/73, Air America reconstructed 14 former US Navy and US Marines UH-34Ds at Udorn and delivered them to the TNI-AU or Indonesian Air Force (see: UTD/Abadie/B1F4+5). This was called “Project Peace rotor”. Probably, these aircraft were later based at Semplak AFB, West Java (Lundh, Sikorsky H-34, p. 84). Only one of the UH-34Ds that are listed in Lundh, Sikorsky H-34, p. 84, as belonging to the Indonesian Air Force, was a former “Peace rotor” aircraft. Those UH-34s had already been deactivated by the USMC long time before (see: Sid Nanson, “USMC Helicopter Disposition Vietnam Era”, formerly at: http://popasmoke.com/dispositions.html; info kindly sent to the author by Steve Stevens in his e-mail dated 2 January 2005). Those known TNI-AU aircraft were:

J. L. Forney, letter dated 17 July 72 sent to Detachment 11, AFCMC re “Peace rotor” UH-34s
(in: UTD/Bisson/B5, microfilm reel no. 24)
On 27 June 72, 10 UH-34 helicopters arrived at Udorn via truck, followed by another 11 UH-34 helicopters by truck on 30 June 72. All of them were in very poor condition and seem to have come from Vietnam. A letter that J. L. Forney, Air America’s Acting Vice-President at Laos, sent to Detachment 11, AFCMC (Air Force Contract Maintenance Center) at Udorn on 17 July 72, makes clear that Air America was to rebuild 14 UH-34 helicopters: “It should be noted at this point that both BuNo 145782 and 147175 are configured in the older UH-34D style and, as such, are identical in many respects to the 13 ‘G’ models. Therefore, in developing 14 aircraft of the same configuration, we propose to use one of these along with the 13 ‘G’ models if the project to restore 14 aircraft to operational condition is approved” (J. L. Forney, letter of 17 July 72 to Detachment 11, AFCMC, in: UTD/Bisson/B5, microfilm reel no. 24).

Problems and errors:

**H-811** flown Udorn (T-08) - Long Tieng (LS-20A) - Udorn (T-08) on 5 May 73 (Log book of E. Munsell, in: UTD/Munsell/B3F24; type not given); believed to be S-58T XW-PHA (c/n 58.1398, ex BuA 148811).

H-?? **c/n 58.133, a H-34A ex SVNAF “54-886”,** reportedly lost on 30 March 63 or in May 1963: According to official Air America documents, this aircraft was not part of Air America’s UH-34 fleet, nor does the accident appear in Air America’s list “Aircraft accidents 1963” (in: UTD/CIA/B49F2). As the H-34s of the SVNAF’s 219th Helicopter Squadron (“Kingbees”) also carried out covert cross border operations into Southern Laos (Plaster, SOG, pp. 88/9), it was probably one of their helicopters whose loss was attributed to Air America, as it was known that Air America operated UH-34s in Laos.

H-?? **BuA 150556 c/n 58.1683**: This aircraft was reported to have been lost on 18 April 71; but no Air America UH-34D was lost on 18 April 71; probably, this is an error for Air America UH-34D H-45 c/n 58.1778 ex BuA 153556, which was lost at Long Tieng on 18 April 74.

Unidentified accidents of Air America helicopters (possibly UH-34s):

1. **UH-34D** exploded while on the ground near the Ho Chi Minh trail on a supply mission, date unknown (Robbins, *Air America*, p. 130).
2. **UH-34D** was shot down in the Plain of Jars around 1968 (Robbins, *Air America*, p. 146).
3. **UH-34D** sustained damages during a semi-controlled crash landing after receiving battle damage to the auxiliary and primary hydraulic flight control servo systems. All aboard received minor injuries and the aircraft was subsequently destroyed by persons unknown, probably in 71 or 72, location and date unknown (Accident summary, in: UTD/Hickler/B24F2).
4. **UH-34D** received in-flight small arms fire just prior to landing. The aircraft made an immediate engine-out landing and the aircrew successfully evaded the hostile forces, probably in 71 or 72, location and date unknown (Accident summary, in: UTD/Hickler/B24F2).
5. **UH-34D** was destroyed by an internal explosion, as the munitions cargo was being unloaded, probably in 71 or 72, location and date unknown (Accident summary, in: UTD/Hickler/B24F2).
6. **UH-34D** was hit by large caliber weapon just prior to touchdown. The captain executed an immediate go-around but fire was observed in the rear fuel cell area. An immediate emergency landing was made and all occupants successfully evacuated the aircraft and the area. The helicopter was destroyed by fire, probably in 71 or 72, location and date unknown (Accident summary, in: UTD/Hickler/B24F2).

Air America also maintained the UH-34Ds of the Royal Lao Air Force, but they are listed in a separate file within *The Aircraft of Air America*, called *Royal Lao Air Force UH-34Ds* (see [http://www.utdallas.edu/library/specialcollections/hac/cataam/Leeker/aircraft/index.html](http://www.utdallas.edu/library/specialcollections/hac/cataam/Leeker/aircraft/index.html)).
UH-34Ds of the *Commission Internationale de Contrôle*

Air America’s repair facility at Udorn, Thailand also maintained the 6 UH-34Ds of the *Commission Internationale de Contrôle* which was responsible for supervising the neutrality of Laos since 1962. During their missions these former Air America UH-34Ds were mostly flown by French pilots and used to supervise the observance to be paid to the Geneva Accords. But periodically they came in to Air America’s facility at Udorn, where they were maintained and later test flown by Air America pilots. For example, Air America pilot Elmer Munsell notes in his log books (preserved in: UTD/Munsell/B3F24) that he flew CIC-4 and CIC-5 on 29 July 63, CIC-5 and CIC-6 on 24 October 63, CIC-6 on 3 December 63, CIC-4 on 22 December 63, CIC-4 on 3 January 64, CIC-1 on 15 January 64, and CIC-5 on 16 May 64, all on test flights out of Udorn. The CIC UH-34Ds were still maintained by Air America in 1967 as part of the AF62-(531)-1841 contract. In 1967, CIC offered to sell them to AAM (Minutes ExCom-AACL/AAM of 25 July 67, in: UTD/CIA/B8F2). Those UH-34Ds were painted all white and had a big CIC on the side as well as their actual serial. They were:

**UH-34D CIC-2**  58.1390  4 Sept. 62  ex Air America H-Y and BuA 148805

*Service history:* identity given in: “Helicopter identification”, in: UTD/Hickler/B26F19); maintained by Air America; lost at an unknown location in Laos on 3 May 63, given as a loss in the list “Aircraft destroyed or lost” (UTD/CIA/B49F2); not mentioned in the list “Aircraft accidents 1963" (in: UTD/CIA/B49F2); Air America offered to recover it (Minutes ExCom-AAM of 9 April 63, in: UTD/CIA/B3F4); probably the accident had taken place at an earlier date, so that 3 May 63 was only the date of write-off; apparently later recovered by Air America on behalf of their own; not current with Air America in April 64 (Operations Circular of 1 April 64, in: UTD/Kirkpatrick/B8F4).

*Fate:* returned to Air America as H-48 on 29 March 67; for the subsequent history see there.

*Fate:* given to R.Lao AF as “8806” in ?; not current with the RLAF on 1 April 72 (List of assigned / maintained aircraft as of 1 April 72, in: UTD/CIA/B49F2).
