

## Planning Your MAT-SE Non-Thesis Degree

Following are three examples of degree plans to help you with your planning. First, take a look at the grid which tells you when particular classes are offered and which courses require a pre/co-requisite. You may take up to five years to complete your degree; after that your oldest courses will no longer be counted toward your degree.

Courses	Course Type	Fall	Spring	Summer
MATH 5310	Core			X
MATH 5320 (May be repeated 5 time as topics change)	Core	X	X	X
MATH 5330 Topics in Mathematics	Elective	X	X	X
MATH 5V06 Special Topics in Mathematics	Elective	X	X	X

Other mathematics courses (MATH, CS) may be substituted for mathematics elective classes; contact the graduate advisor.
