Notes:

*PHYS 2421 Honors Physics I may be electively substituted for PHYS 2325.

*PHYS 2422 Honors Physics II may be electively substituted for PHYS 2326.

*PHYS 2127/2327 may be substituted for PHYS 2126/2326 for a student who has transferred to Physics from an engineering major.

*PHYS 4390 or PHYS 4399 may be substituted for NATS 4310 to satisfy the advanced writing requirement.

51 Hours of upper division courses (course numbers beginning with 3 or greater) is required for all degrees.

**Research Experiences for Undergraduates (REUs) during the summer are highly recommended for Physics majors planning to continue their education in graduate school, whether in physics or another discipline. Formal REU programs exist at many universities, national laboratories, and even overseas, and typically offer a stipend typical of a graduate teaching assistantship. Announcements for REU programs usually appear online in December and application deadlines usually range from late January to early March. Requirements vary, but students are eligible for some REU programs at the end of their freshman year. If you wish to do an REU during the summer following your junior year, please plan to complete PHYS 4373 Physical Measurements during the Spring semester of your junior or senior year.
