Adding General Chemistry I (CHEM 1311/1111) to Schedule Planner

Because specific labs are linked to each Chemistry Lecture, please follow the following procedure for selecting your General Chemistry class in Schedule Planner.

Log into Galaxy with your netid and password. Click on Schedule Planner under you Orion Self-Service.

In Schedule Planner, click on ‘Add Course’.

Click on the ‘Search By Attribute’. Then select one of the CHEM 1311/1111 Groups.

Then add each of the Courses listed.
If there are additional courses you would like to add use the ‘By Subject’ tab to select the additional Courses. Once you’ve added all the courses select Done.

Click on Generate Schedules and select the schedule you like best.

If you don’t like any schedules with the group you have selected, remove the CHEM 1311 and CHEM 1111 from your course list and add a different group.
