

# Quantile Effects of College Quality on the Distribution of Earnings

presented by **Rodney J. Andrews**,  
Director - Texas Schools Project, UT Dallas ERC

Previous research has demonstrated that college quality has an effect on earnings. However, previous studies have focused on the mean.

Dr. Rodney Andrews and co-authors examine the effects of college quality on the distribution of earnings. They find that the returns to attending a high quality institution are large and vary throughout the distribution of earnings.

This research is a Joint Advisory Board approved project being conducted at the UT Dallas Education Research Center.

**Friday, September 16**  
**10-11am**  
**Green Hall, Room 3.606**  
**The University of Texas at Dallas**

Feel free to forward this invitation to friends and colleagues.

Visitor parking permits and parking information are available at the drive-up window of the UT Dallas Visitor Center. (Go to [utdallas.edu/maps/](http://utdallas.edu/maps/) for a Campus Map.)

Cookies and beverages provided.
