Stay Hydrated

How much water does your body need? It depends on you and your circumstances. If you are active on a hot day, you will need more water than if you are sitting in an cool office. An average person on an average day needs about 3 quarts of water.

Signs of Dehydration Include:
Thirst, dry skin, urinating less often than usual, dark-colored urine, feeling tired, or dizziness and fainting.

These tips can help:
- Limit outdoor activity to morning and evening hours.
- Cut down on exercise when it's hot.
- Drink 2-4 glasses of cool fluids each hour.
- Try to rest often in shady areas.
- Protect yourself from the sun by wearing a hat and sunglasses.
