

**Course** EESC 6349 501: Random Processes  
**Professor** Hlaing Minn  
**Term** Fall 2010  
**Meetings** MW 7:00-8:15 PM, ECSN 2.126

---

**Professor's Contact Information**

**Office Phone:** 972 883 2889  
**Office Location:** ECSN 4.204  
**Email Address:** hlaing.minn@utdallas.edu  
**Office Hours:** MW 3:30-4:30 PM or by appointment

**TA:** TBA

**General Course Information**

|                                       |   |
|---------------------------------------|---|
| <b>Pre-requisites</b>                 | EE 3302 & EE 3341 or equivalent courses   |
| <b>Course Description</b>             | This course is intended for first year graduate students in Electrical and Telecommunications Engineering Programs. Broad range of topics such as statistics of functions of multiple random variables, random vectors, random sequences, convergence of random sequences, random processes, correlation, power spectral density, and responses of linear systems to the input of random processes or random sequences are presented.   |
| <b>Learning Objectives / Outcomes</b> | <ol style="list-style-type: none"><li>1. Compute statistics (joint and marginal probability density functions, means, variances) of multiple transformations (functions) of multiple random variables</li><li>2. Compute statistics of random vectors in terms of mean vector, correlation matrix, covariance matrix, joint probability density function</li><li>3. Assess different modes of convergence of random sequences</li><li>4. Compute statistics of random processes and random sequences in terms of correlation functions, power spectral density, probability density functions, mean, power and higher order statistics</li><li>5. Compute statistics of output random processes or sequences of linear systems to input random processes or sequences</li><li>6. Assess stationarity, wide-sense stationarity, cyclo-stationarity, and ergodicity of a random process</li><li>7. Express a random process using Karhunen-Loeve and other orthogonal function expansions</li><li>8. Apply the concepts of probability, random vectors, random sequences, and random processes to analyze statistical problems in Electrical and Telecommunication Engineering fields</li></ol> |

### Assignments & Academic Calendar

| Lists of Topics                            | Number of Weeks                   |
|--|-----------------------------------|
| Review of Probability and Random Variables | ~ 2 weeks                         |
| Functions of Random Variables              | ~ 1 weeks                         |
| Random Vectors                             | ~ 2 weeks                         |
| Random Sequences                           | ~ 3 weeks                         |
| Random Processes                           | ~ 3 weeks                         |
| Advanced Topics in Random Processes        | ~ 2 week                          |
| Exam.                                      | Date & Time                       |
| 1st Mid-term Exam.                         | Wed. Sept. 22, 2010, 7:00-8:15 PM |
| 2nd Mid-term Exam.                         | Wed. Oct. 27, 2010, 7:00-8:15 PM  |
| 3rd Mid-term Exam.                         | Wed. Nov. 24, 2010, 7:00-8:15 PM  |
| Final Exam.                                | Mon. Dec. 13, 2010, 7:00-9:00 PM  |

**Course Policies**

|  |  |
|--|--|
| <p><b>Grading<br/>(credit)<br/>Criteria</b></p>      | <p>Final grades in this course will be based on several homework assignments/quizzes, mid-term examinations and a final examination. No makeup examinations will be offered in this course. In the event of an excused absence (illness, job-related travel, holy day absence, etc.; only one excused exam (mid-term) is allowed; no absence for the final exam.), proper documents should be provided; the weight of the exam will be shifted to the final exam. All exams are closed-book, closed-note. No electronic devices except a basic calculator are allowed. Any graded work can be disputed in writing <i>within one week</i> of the return or release of that work or grade. Complete work will be re-graded. All announcements and homework assignments will be posted at <a href="http://elearning.utdallas.edu">http://elearning.utdallas.edu</a>. It is the responsibility of each student to check this web page at least once a week for new announcements and homeworks. In cases of the elearning server down-time, please check <a href="http://www.utdallas.edu/~hlaing.minn/teaching.html">www.utdallas.edu/~hlaing.minn/teaching.html</a> for announcements and course material postings.</p> <p>The grading policy is:</p> <p style="padding-left: 40px;">Assignments / Quizzes: 10 %<br/> Three Mid-Term Exams: 45 %<br/> Final Exam: 45 %</p>   |
| <p><b>Student<br/>Conduct and<br/>Discipline</b></p> | <p>The University of Texas System and The University of Texas at Dallas have rules and regulations for the orderly and efficient conduct of their business. It is the responsibility of each student and each student organization to be knowledgeable about the rules and regulations which govern student conduct and activities. General information on student conduct and discipline is contained in the UTD publication, <i>A to Z Guide</i>, which is provided to all registered students each academic year.</p> <p>The University of Texas at Dallas administers student discipline within the procedures of recognized and established due process. Procedures are defined and described in the <i>Rules and Regulations, Board of Regents, The University of Texas System, Part 1, Chapter VI, Section 3</i>, and in Title V, Rules on Student Services and Activities of the university's <i>Handbook of Operating Procedures</i>. Copies of these rules and regulations are available to students in the Office of the Dean of Students, where staff members are available to assist students in interpreting the rules and regulations (SU 1.602, 972/883-6391).</p> <p>A student at the university neither loses the rights nor escapes the responsibilities of citizenship. He or she is expected to obey federal, state, and local laws as well as the Regents' Rules, university regulations, and administrative rules. Students are subject to discipline for violating the standards of conduct whether such conduct takes place on or off campus, or whether civil or criminal penalties are also imposed for such conduct.</p> |
| <p><b>Academic<br/>Integrity</b></p>                 | <p>The faculty expects from its students a high level of responsibility and academic honesty. Because the value of an academic degree depends upon the absolute integrity of the work done by the student for that degree, it is imperative that a student demonstrate a high standard of individual honor in his or her scholastic work.</p> <p>Scholastic dishonesty includes, but is not limited to, statements, acts or omissions related to applications for enrollment or the award of a degree, and/or the submission as one's own work or material that is not one's own. As a general rule, scholastic dishonesty involves one of the following acts: cheating, plagiarism, collusion and/or falsifying academic records. Students suspected of academic dishonesty are subject to disciplinary</p>   |

|                                     |  |
|-------------------------------------|--|
|                                     | <p>proceedings.</p> <p>Plagiarism, especially from the web, from portions of papers for other classes, and from any other source is unacceptable and will be dealt with under the university's policy on plagiarism (see general catalog for details). This course will use the resources of turnitin.com, which searches the web for possible plagiarism and is over 90% effective.</p>   |
| <b>Email Use</b>                    | <p>The University of Texas at Dallas recognizes the value and efficiency of communication between faculty/staff and students through electronic mail. At the same time, email raises some issues concerning security and the identity of each individual in an email exchange. The university encourages all official student email correspondence be sent only to a student's U.T. Dallas email address and that faculty and staff consider email from students official only if it originates from a UTD student account. This allows the university to maintain a high degree of confidence in the identity of all individual corresponding and the security of the transmitted information. UTD furnishes each student with a free email account that is to be used in all communication with university personnel. The Department of Information Resources at U.T. Dallas provides a method for students to have their U.T. Dallas mail forwarded to other accounts.</p>  |
| <b>Withdrawal from Class</b>        | <p>The administration of this institution has set deadlines for withdrawal of any college-level courses. These dates and times are published in that semester's course catalog. Administration procedures must be followed. It is the student's responsibility to handle withdrawal requirements from any class. In other words, I cannot drop or withdraw any student. You must do the proper paperwork to ensure that you will not receive a final grade of "F" in a course if you choose not to attend the class once you are enrolled.</p>   |
| <b>Student Grievance Procedures</b> | <p>Procedures for student grievances are found in Title V, Rules on Student Services and Activities, of the university's <i>Handbook of Operating Procedures</i>.</p> <p>In attempting to resolve any student grievance regarding grades, evaluations, or other fulfillments of academic responsibility, it is the obligation of the student first to make a serious effort to resolve the matter with the instructor, supervisor, administrator, or committee with whom the grievance originates (hereafter called "the respondent"). Individual faculty members retain primary responsibility for assigning grades and evaluations. If the matter cannot be resolved at that level, the grievance must be submitted in writing to the respondent with a copy of the respondent's School Dean. If the matter is not resolved by the written response provided by the respondent, the student may submit a written appeal to the School Dean. If the grievance is not resolved by the School Dean's decision, the student may make a written appeal to the Dean of Graduate or Undergraduate Education, and the dean will appoint and convene an Academic Appeals Panel. The decision of the Academic Appeals Panel is final. The results of the academic appeals process will be distributed to all involved parties.</p> <p>Copies of these rules and regulations are available to students in the Office of the Dean of Students, where staff members are available to assist students in interpreting the rules and regulations.</p> |
| <b>Incomplete Grades</b>            | <p>As per university policy, incomplete grades will be granted only for work unavoidably missed at the semester's end and only if 70% of the course work has been completed. An incomplete grade must be resolved within eight (8) weeks from the first day of the subsequent long semester. If the required work to complete the course and to remove the incomplete grade is not submitted by the specified deadline, the incomplete grade is changed automatically to a grade of <b>F</b>.</p>  |

|  |  |
|--|--|
| <p><b>Disability Services</b></p>                          | <p>The goal of Disability Services is to provide students with disabilities educational opportunities equal to those of their non-disabled peers. Disability Services is located in room 1.610 in the Student Union. Office hours are Monday and Thursday, 8:30 a.m. to 6:30 p.m.; Tuesday and Wednesday, 8:30 a.m. to 7:30 p.m.; and Friday, 8:30 a.m. to 5:30 p.m.</p> <p>The contact information for the Office of Disability Services is:<br/> The University of Texas at Dallas, SU 22<br/> PO Box 830688<br/> Richardson, Texas 75083-0688<br/> (972) 883-2098 (voice or TTY)</p> <p>Essentially, the law requires that colleges and universities make those reasonable adjustments necessary to eliminate discrimination on the basis of disability. For example, it may be necessary to remove classroom prohibitions against tape recorders or animals (in the case of dog guides) for students who are blind. Occasionally an assignment requirement may be substituted (for example, a research paper versus an oral presentation for a student who is hearing impaired). Classes enrolled students with mobility impairments may have to be rescheduled in accessible facilities. The college or university may need to provide special services such as registration, note-taking, or mobility assistance.</p> <p>It is the student's responsibility to notify his or her professors of the need for such an accommodation. Disability Services provides students with letters to present to faculty members to verify that the student has a disability and needs accommodations. Individuals requiring special accommodation should contact the professor after class or during office hours.</p> |
| <p><b>Religious Holy Days</b></p>                          | <p>The University of Texas at Dallas will excuse a student from class or other required activities for the travel to and observance of a religious holy day for a religion whose places of worship are exempt from property tax under Section 11.20, Tax Code, Texas Code Annotated.</p> <p>The student is encouraged to notify the instructor or activity sponsor as soon as possible regarding the absence, preferably in advance of the assignment. The student, so excused, will be allowed to take the exam or complete the assignment within a reasonable time after the absence: a period equal to the length of the absence, up to a maximum of one week. A student who notifies the instructor and completes any missed exam or assignment may not be penalized for the absence. A student who fails to complete the exam or assignment within the prescribed period may receive a failing grade for that exam or assignment.</p> <p>If a student or an instructor disagrees about the nature of the absence [i.e., for the purpose of observing a religious holy day] or if there is similar disagreement about whether the student has been given a reasonable time to complete any missed assignments or examinations, either the student or the instructor may request a ruling from the chief executive officer of the institution, or his or her designee. The chief executive officer or designee must take into account the legislative intent of TEC 51.911(b), and the student and instructor will abide by the decision of the chief executive officer or designee.</p>  |
| <p><b>Off-Campus Instruction and Course Activities</b></p> | <p>Off-campus, out-of-state, and foreign instruction and activities are subject to state law and University policies and procedures regarding travel and risk-related activities. Information regarding these rules and regulations may be found at <a href="http://www.utdallas.edu/BusinessAffairs/Travel_Risk_Activities.htm">http://www.utdallas.edu/BusinessAffairs/Travel_Risk_Activities.htm</a>. Additional information is available from the office of the school dean.</p>   |
