INSTRUCTIONS:

1. On this cover sheet: Fill out your name (Last, First), circle your section, and down the first column of the POINTS grid write the section numbers, e.g. 12.1, 12.2, 12.3. Leave the other columns blank.

2. **STAPLE** this cover sheet to your homework (top left corner).

3. When you write your solutions, use a single column (not double columns) for your answers.

4. At the start of each problem write the problem number in a **different color and circle it**. Use the following format: **12.3.5** means Section 12.3 problem 5.

5. Show all work and give **complete explanations**:
   - (a) Briefly state the relevant **theory**.
   - (b) Make it clear how you are **applying** this theory to solve the problem.
   - (c) Check your work.

6. **Box or highlight** the final answer to the problem.

7. Draw a **horizontal dividing line** between each problem.

You may lose credit for failing to follow these instructions even if you obtain the correct answer.
