

SPECIAL UPCOMING EVENT ANNOUNCEMENT!

Real-World Field Trips for Science Educators

Learning and studying in the field present some challenges.

How do you know what is important?

How do you know if what you observe is or is not typical?

How do you know when you are finished?

Hopefully the answer to this third question is that you're never finished; ideally the techniques and information remain with you, supporting lifelong learning.

Habits and Habitats: How the real-world is 'hooked' together

Saturday, March 22, 2003 | 9am-3pm

The Heard Natural Science Museum & Wildlife Sanctuary (McKinney, TX)

Enjoy a day of discovery in a unique natural environment.

We'll start with an introduction and tour of the museum. After we learn about on-going bird banding research in the wetland area, we'll practice some water sampling and explore the sanctuary!

Bring your own sack lunch, snacks, and non-alcoholic beverages (*and binoculars if you have some*) for the day.

TrailBlazers get
2.0 miles closer to the
summit!

*Fee = \$10 per person. Space is limited to 20 participants; **apply by March 05, 2003.***

Requires a moderate skill level and provides a moderate physical challenge.
