SmILE is a group program designed for young children who:
- Are 2-3 years old
- Have expressive language delays
- Have a limited phonemic repertoire

SmILE:
- Provides intensive language intervention and social skills development
- Is designed to facilitate language emergence
- Is organized by content themes in a pre-school routine
- Includes floor-time play, circle time, simple crafts, sensory activities, snack time and opportunities for storybook interaction

Participation in the program is based on a current evaluation and office consultation with the speech-language pathologist who coordinates the SmILE schedule. Spring and Fall sessions are 12 weeks. Summer sessions are 6 weeks.
