TurningPoint 5 Clicker Training: Process for Using Clickers in the Classroom

What do I need to do to use clickers in a class?

1. Obtain a laptop.

2. Notify the eLearning Team of your intent to use clickers by completing the Web Form at: https://utdallas.qualtrics.com/SE/?SID=SV_cUbZ79KQ8ANmsrH
   - eLearning will order you an instructor kit which includes a receiver, software, and a clicker

3. Schedule training with the eLearning Team (Once you submit the form above, we will contact you for this):
   - We will assign you a unique Radio Frequency so you will not experience interference from other classes using clickers.
   - Assist with software installation if needed.
   - Assist with setting up eLearning so students can register their clickers
   - Configure settings so results can be exported to eLearning (if needed).

4. Notify the bookstore that you will require students to purchase the Turning Technologies clicker at: https://adoptions.efollett.com/OnlineAdoptionsWeb/onlineAdoptions.html?storeNumber=1163&langId=en_US
   (Please note: Create a new account for the bookstore.) Bookstore supplied password: 1163

5. Include the following paragraph in your syllabus:

   This course will require the use of a clicker. A clicker is an audience response device that resembles a small calculator. This allows you to provide real-time feedback to your instructor during class. Class summary results are displayed graphically, providing students and the instructor a gauge as to how well the class is grasping the material. You can purchase (and sell back) your clicker at the UTD Bookstore.

If you have any questions or concerns please contact Brian S. Miller. His email address is: Brian.Miller@utdallas.edu.
