School of Social Sciences

The social sciences are concerned with the study of people, individually and in groups and collectivities. Social scientists ask such questions as: How are groups formed? How do people produce and distribute goods? Why do cities grow, and why do some cities decay? What are the causes of war, of racial discrimination, of revolutions? What role does law play in our society? And, how can we improve our quality of life?

Thus, the major concern of the social sciences is the testing of ideas about social, political, and economic institutions. The methods of study and research may range from quiet introspection to participant observation in a community setting to the manipulation of computerized data using advanced statistical techniques. Yet in this great diversity there remains a shared commitment to the description, explanation, and prediction of human behavior -- to understanding. And increasingly, social scientists have added a commitment to action: applying their ideas to real-world situations.

Programs and General Courses

The School of Social Sciences has six degree-granting programs: Crime and Justice Studies, Economics and Finance, Geography, Government and Politics, Public Administration, and Sociology. Within each of these programs, students may specialize in areas that complement their interests and career plans, such as urban studies, political economy, law and society, and comparative studies.

Social Science Core Requirements

All undergraduates receiving degrees in the School of Social Sciences must have taken and passed a core of courses designed to provide breadth and an interdisciplinary perspective beyond any individual social science discipline. These courses include:
• Three semester hours in economics (normally ECO 2302 Principles of Microeconomics or ECO 2301 Macroeconomics);
• Three semester hours in sociology
• SOCS 3303 Introduction to Social Statistics
• SOCS 3103 Social Statistics Laboratory
• IS 3336 Culture Regions, or some other Social Science course with a comparative or international focus, such as CJS 3319, ECO 3370, ECO 4360, ECO 4362, ECO 4382, GOVT 3328, GOVT 3350, GOVT 4320, ISSS 3347, ISSS 3349, or ISSS 4366

Undergraduate Social Science majors (Economics and Finance, Geography, Government and Politics, Public Administration, and Sociology) with a strong academic record (3.0 or above) are encouraged to enter the Fast Track program, which allows students to take graduate courses for undergraduate credit while at the same time satisfying requirements for a master's degree in Applied Economics, Geographic Information Sciences, Applied Sociology, or Public Affairs. Qualified seniors may take up to 15 credit hours of graduate courses during their senior year. Students enrolled in the Fast Track must maintain a 3.0 grade point average and earn grades of B or better in graduate courses taken. Students who are interested in the Fast Track should talk with the College Master and complete an application form prior to the final 30 credit hours of work for the B.A. or B.S. degree

Sociology (B.A.)

Sociologists analyze the structure of groups in society and the way these groups influence the behavior of individuals. Related to these larger ideas are many specific questions: What explains inequalities? Why do crime and deviance arise? How do families, schools, churches, and corporations effect social control? What are the functions of welfare programs? How do cities grow and change to reflect changing technologies and population trends? How does law interact with society? These are examples of sociological questions.

At The University of Texas at Dallas, sociology majors are encouraged to go beyond scholarly study to explore the ways that sociology can be put to use in businesses, government, or voluntary organizations. Sociology graduates of the university have pursued careers or graduate study in a variety of areas including policy research, social services, business, law, law enforcement, and other social sciences.
