

Naveen Jindal School of Management

Doctor of Philosophy in Management Science

Curriculum

Management science is defined as the use of economics, behavioral science, mathematics and statistics to conduct rigorous scientific research. The PhD in Management Science degree program encompasses both theory and empirical analysis and is characterized by a high ratio of research faculty to students, which fosters close working relationships.

The program requires students to choose from one of the following areas (concentrations) of study:

- Accounting
- Finance
- Information Systems
- Marketing
- Operations Management

The program features core and elective courses that provide students a thorough understanding of management principles. Coursework incorporates a broad outlook into the study of business theory and practice while providing flexibility that enables students to pursue their interests. A sequence of PhD seminars exposes students to traditional and emerging research issues, and students are encouraged early in their graduate work to be involved in research projects with experienced faculty. Students quickly identify and develop research ideas and create their own research agenda.

Career Options

Graduates of the program seek positions such as: professor, researcher, public or private-sector consultant.

Location

The PhD in Management Science requires 75 semester credit hours minimum beyond the baccalaureate degree. For complete admission and degree requirements, view the Graduate Catalog at catalog.utdallas.edu.
