We are currently only looking for research assistants who will be able to work with us and be on campus during the Summer 2019 semester (June – August).

*If you are interested in directed research, you must register for at least 2 hours of credit which requires six hours per week commitment in the lab. If you want to register for 3 hours of credit you must commit to nine hours per week in the lab.

**There is a minimum requirement for volunteers of six hours per week.

Please answer the questions below:
1. Describe what your future goals are (graduate school, career, etc.):

2. What are you hoping to gain from your experience working with the BlackBerry project?

Please See Back

Thank you for your interest! When you complete this application, please email it to Kaitlyn Burnell (kpb160330@utdallas.edu)
3. We are currently have two positions open. The first is running participants through a study procedure during the Summer 2019 semester. The second is learning how to observationally code Instagram posts during the Summer 2019 semester, and coding real Instagram posts during the Fall 2019 semester. Do you have a preference for one of these positions? If so, why?

4. If you are available during the Summer 2019 semester, do you currently have any travel plans or large periods of time during the week (i.e., more than a few days) in which you would be unable to work? If so, when?
