Are extra-curricular reading programs good for your brain?

The Lifetime Neuroscience and Cognition Lab is seeking volunteers for a study of how reading my affect cognition in children.

LiNC Lab is looking for children ages 6 to 10 to participate in this study. Participants will have their memory and attention evaluated both before and after reading a new (age appropriate) book. As thanks for volunteering, participants can keep the book when they’re done with the study!

If you’re interested in volunteering your child for this study, please contact us at:
