What is Food and Fun?
Food and Fun is pediatric feeding therapy for children ages 2 to 5 years that addresses the oral motor, sensory, social and play aspects of feeding in a group setting. The group is led by a licensed speech-language pathologist with support from graduate student clinicians.

Food and Fun provides intervention for children who have been diagnosed with moderate-to-severe sensory-based feeding disorders by a speech-language pathologist or occupational therapist. The children may or may not have swallowing problems, and they may or may not have typical language. Participation in Food and Fun may complement individual outside therapy.

Food and Fun Program Goals:
• Improve Oral Motor Function - children will work on improving the quality and effectiveness of oral skills with a variety of foods.
• Improve Sensory Integration - children will work on decreasing oral defensiveness/aversion and accepting various sensory experiences with food, including changes in temperature, taste and texture.
• Encourage the Social Aspects of Eating - children will experience eating in a fun and social environment.
• Parent Education and Support - students and guest speakers will provide education and support.

When:
Thursdays | 3:30 p.m. - 5:00 p.m.
Available fall, spring and summer semesters

Where:
Callier Center Dallas
1966 Inwood Road | Dallas, Texas 75235

Cost:
$180/session (may be insurance eligible)
+ $75 nonrefundable enrollment fee
