
Scrolling and navigation

A navigation icon appears in the phone display to indicate that you can scroll to more options or information. Use the up and down navigation arrows to scroll up or down through lists. When only one up or down navigation arrow shows, it indicates you are at the top or bottom of the list and can only move in the direction indicated by that arrow. Use the right and left navigation arrows to go to other screens when the paging icon (left- and right-facing arrows) displays on the Title Line or to move the cursor right or left when entering text.

When you scroll to a line on the display, that line is selected. For non-color phones, the selected line is highlighted in black with white letters. The softkey labels will change according to the options available for the selected line. The **OK** button is a shortcut for the default action. For example, when you select an entry in your contacts list, pressing the **OK** button places a call to that person.

You can also select a line or feature without scrolling by pressing the corresponding line button.

Avaya Menu

You can use the Avaya Menu to adjust and customize options and settings for your telephone, access additional Web-based applications, get information about your phone and network settings, and log out. When you press the Avaya Menu button, you see the following menus, depending on how your administrator has set up your system and on the applications available to you:

Sample Menu 1	Sample Menu 2	Sample Menu 3
> Options & Settings	> Your 1st Web Application	> Call Settings
> Browser	> Phone Settings	> Application Settings
> Network Information	> Log Out	> Screen & Sound
> Guest Login	> About Avaya one-X	> Advanced Options
> Log Out	> My Pictures	> Network Information
> About Avaya one-X		> My Pictures
> My Pictures		

Options & Settings or Phone Settings, if your menu is customized, lets you change your call settings, personalize button labels, adjust brightness and contrast, select your ringing pattern, and more.

The Browser menu contains additional web-based applications. (If no web applications are available for your phone, the Browser menu is not shown.)

Network Information shows a summary of network-related parameters for your phone.

About Avaya one-X provides the release number of your telephone software.

Guest Login lets you log in to a phone to which you are not normally assigned, to access your own contacts and features.

Log Out lets you sign off the phone, to protect your settings or to allow another user to log in. Log out does not display unless your phone (and any associated button module) is in an idle state.

My Pictures lets you use pictures from a USB device as your telephone screensaver.

Answering and making a call

Answering a call

Answer an incoming call in one of the following ways:

- If you are not on another call, lift the handset or press the line button next to the incoming call, press **Speaker** to answer using the speakerphone, or press **Headset** to answer using the headset.
- If you are on another call and the telephone does not automatically display the incoming call, from the Phone screen scroll to the line with the incoming call and press **Answer** or **OK**. If you are on another call and the telephone does automatically display the incoming call, you can press **Ans Hold** to automatically put the first call on Hold when you answer the new call.

Alternately, you can press **Ans Drop** to automatically drop the first call when you answer the new call.

Making a call

1. Lift the handset, or press **Speaker** or **Headset** (if applicable) or a line button for an available line.
2. Dial the number you want to call.

Using voice dialing

1. Press **Contacts**.
If Voice dialing is enabled, a **Voice** softkey displays.
2. If no tone is generated or if no green bar appears next to the **Voice** softkey, press **Voice** again to restart voice dialing.
3. Within a few seconds or as soon as you hear the tone, say the name of the person you want to call.
4. When one or more contacts display, press the appropriate softkey.

Making a call using edit dialing

Edit dialing works just like making a call on your cell phone - just start entering the number without hearing a dial tone. Using the Bksp softkey, you can backspace to "edit" the number before actually dialing it.

Putting a call on hold

1. Press **Phone** to view the main Phone screen, if necessary.
2. If you are not active on the line you want to put on hold, select that line.
3. Press **Hold**.
4. Press **Resume** or the line button of the held call to retrieve the call.

Transferring a call

1. From the Phone screen, select the line you want to transfer.
2. Press **Transfer** or **OK**.
3. Dial the telephone number, or call the person from the Contacts list, or call the person from the Call Log list.
4. If unattended transfers have been administered, you can hang up now if you do not want to announce the call. Otherwise, press **Complete** or **OK**.

Using USB Flash Drives with your phone

Subject to your administrator's permission, if your telephone has a USB interface and you have a USB (Universal Serial Bus) flash drive (also called a thumb drive or memory stick), you can log into your phone from anywhere in the world, add contacts to your Contacts list from an E-mail or other PC software program, and display pictures from the device on your phone as a screensaver. You can also copy your contact list from your phone to a USB flash drive, replace the contents of your phone's current contact list with those on the USB flash drive, or temporarily use the flash drive's contacts instead of your phone's contact list.
