Dear UT Dallas Community,

During the month of November, the agency was awarded the 2018 EMS First Responder Award presented by the Texas Department of State Health Services. For us, this award is indicative of our ability to continue to maintain a high standard of care and lead the development of collegiate EMS in the DFW area. I am immensely proud of the way our volunteers have continued to perform at the highest level.

This month, our providers responded to a higher number of critical emergencies, highlighting the fantastic working relationship our crews have with the Richardson Fire Department. We have also responded to a steady amount of non-life-threatening calls that have come in directly through our police department dispatch. We are able to take care of approximately 64% of call-outs without the need for City involvement.

Thank you to all our stake-holders that have continued to show support for our mission on campus.

Best Regards,

Scott Bell
Chief, University Emergency Medical Response
