What aspects of this course should remain the same?

1. I really like how Dr. Williams makes it very easy to ask questions and be involved. I never feel scared to ask a question or clarify something because he keeps it so friendly and free of pressure.
2. Professor Williams is extremely intelligent and passionate about math. It was a pleasure to be in his class and learn about his research and publications.

What aspects of this course need improvement?

1. I think some of the readings were a little too difficult, which was a bit off-putting. Something a little more approachable would allow more engagement while still prompting good discussion and thought.
2. The papers we had to read were really long and dense. Most of us aren't as smart or experienced as Professor Williams, so it was tough for us to keep up. I would recommend picking material that is shorter / easier to understand.
[^0]1. I personally greatly enjoi
